DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to an inhaler that is capable of receiving a capsule, blister pack, or a conveyor belt for holding a composition, classified in class 128, subclass 203.15.
- II. Claims 11, 15, 19, and 20, drawn to a capsule, classified in class 206, subclass 528.
- III. Claims 12, 14, 17, and 18, drawn to a blister pack, classified in class 128, subclass 203.21.
- IV. Claims 13, 16, 21, and 22, drawn to a membrane for conveying, classified in class 128, subclass 203.12.

Inventions of Group I and Group II-IV are related as combination and subcombinations. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombinations as claimed because the device of Group I may not contain a blister pack, capsule, or membrane that comprises elevations and/or depressions with a height/depth of 0.1 to 100 microns. The subcombination has separate utility such as to be used in administering a drug. Either

the capsule, blister pack, or conveyor belt may be used as a separate device for administering a drug to a user.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II-IV, restriction for examination purposes as indicated is proper.
